

SomaScan[®] 7K Assay Kit

Reliable Sample Insights

SomaScan 7K Assay Kits detect the most proteins over a broad dynamic range, without sacrificing reproducibility, sensitivity, or specificity. Equipping your laboratory with kits provides:

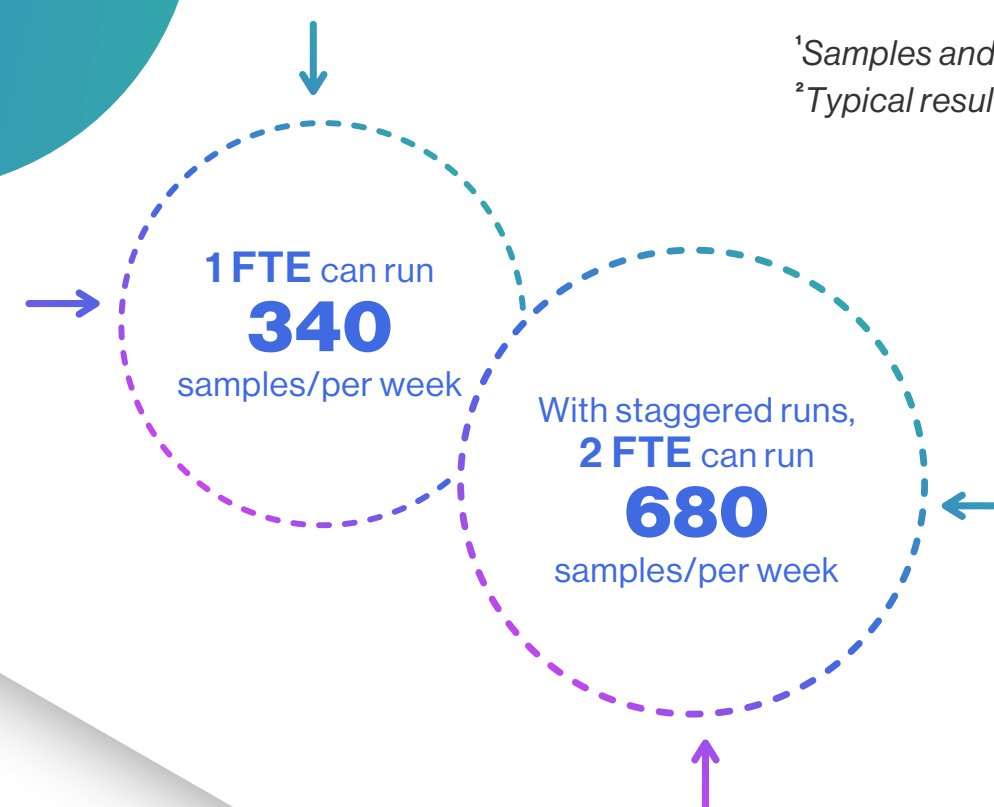

- On-demand, on-site access to large-scale proteomics
- Experimental control for high-throughput projects
- Easier workflow and less "hands on" lab time compared with other assays

Assay Specifics

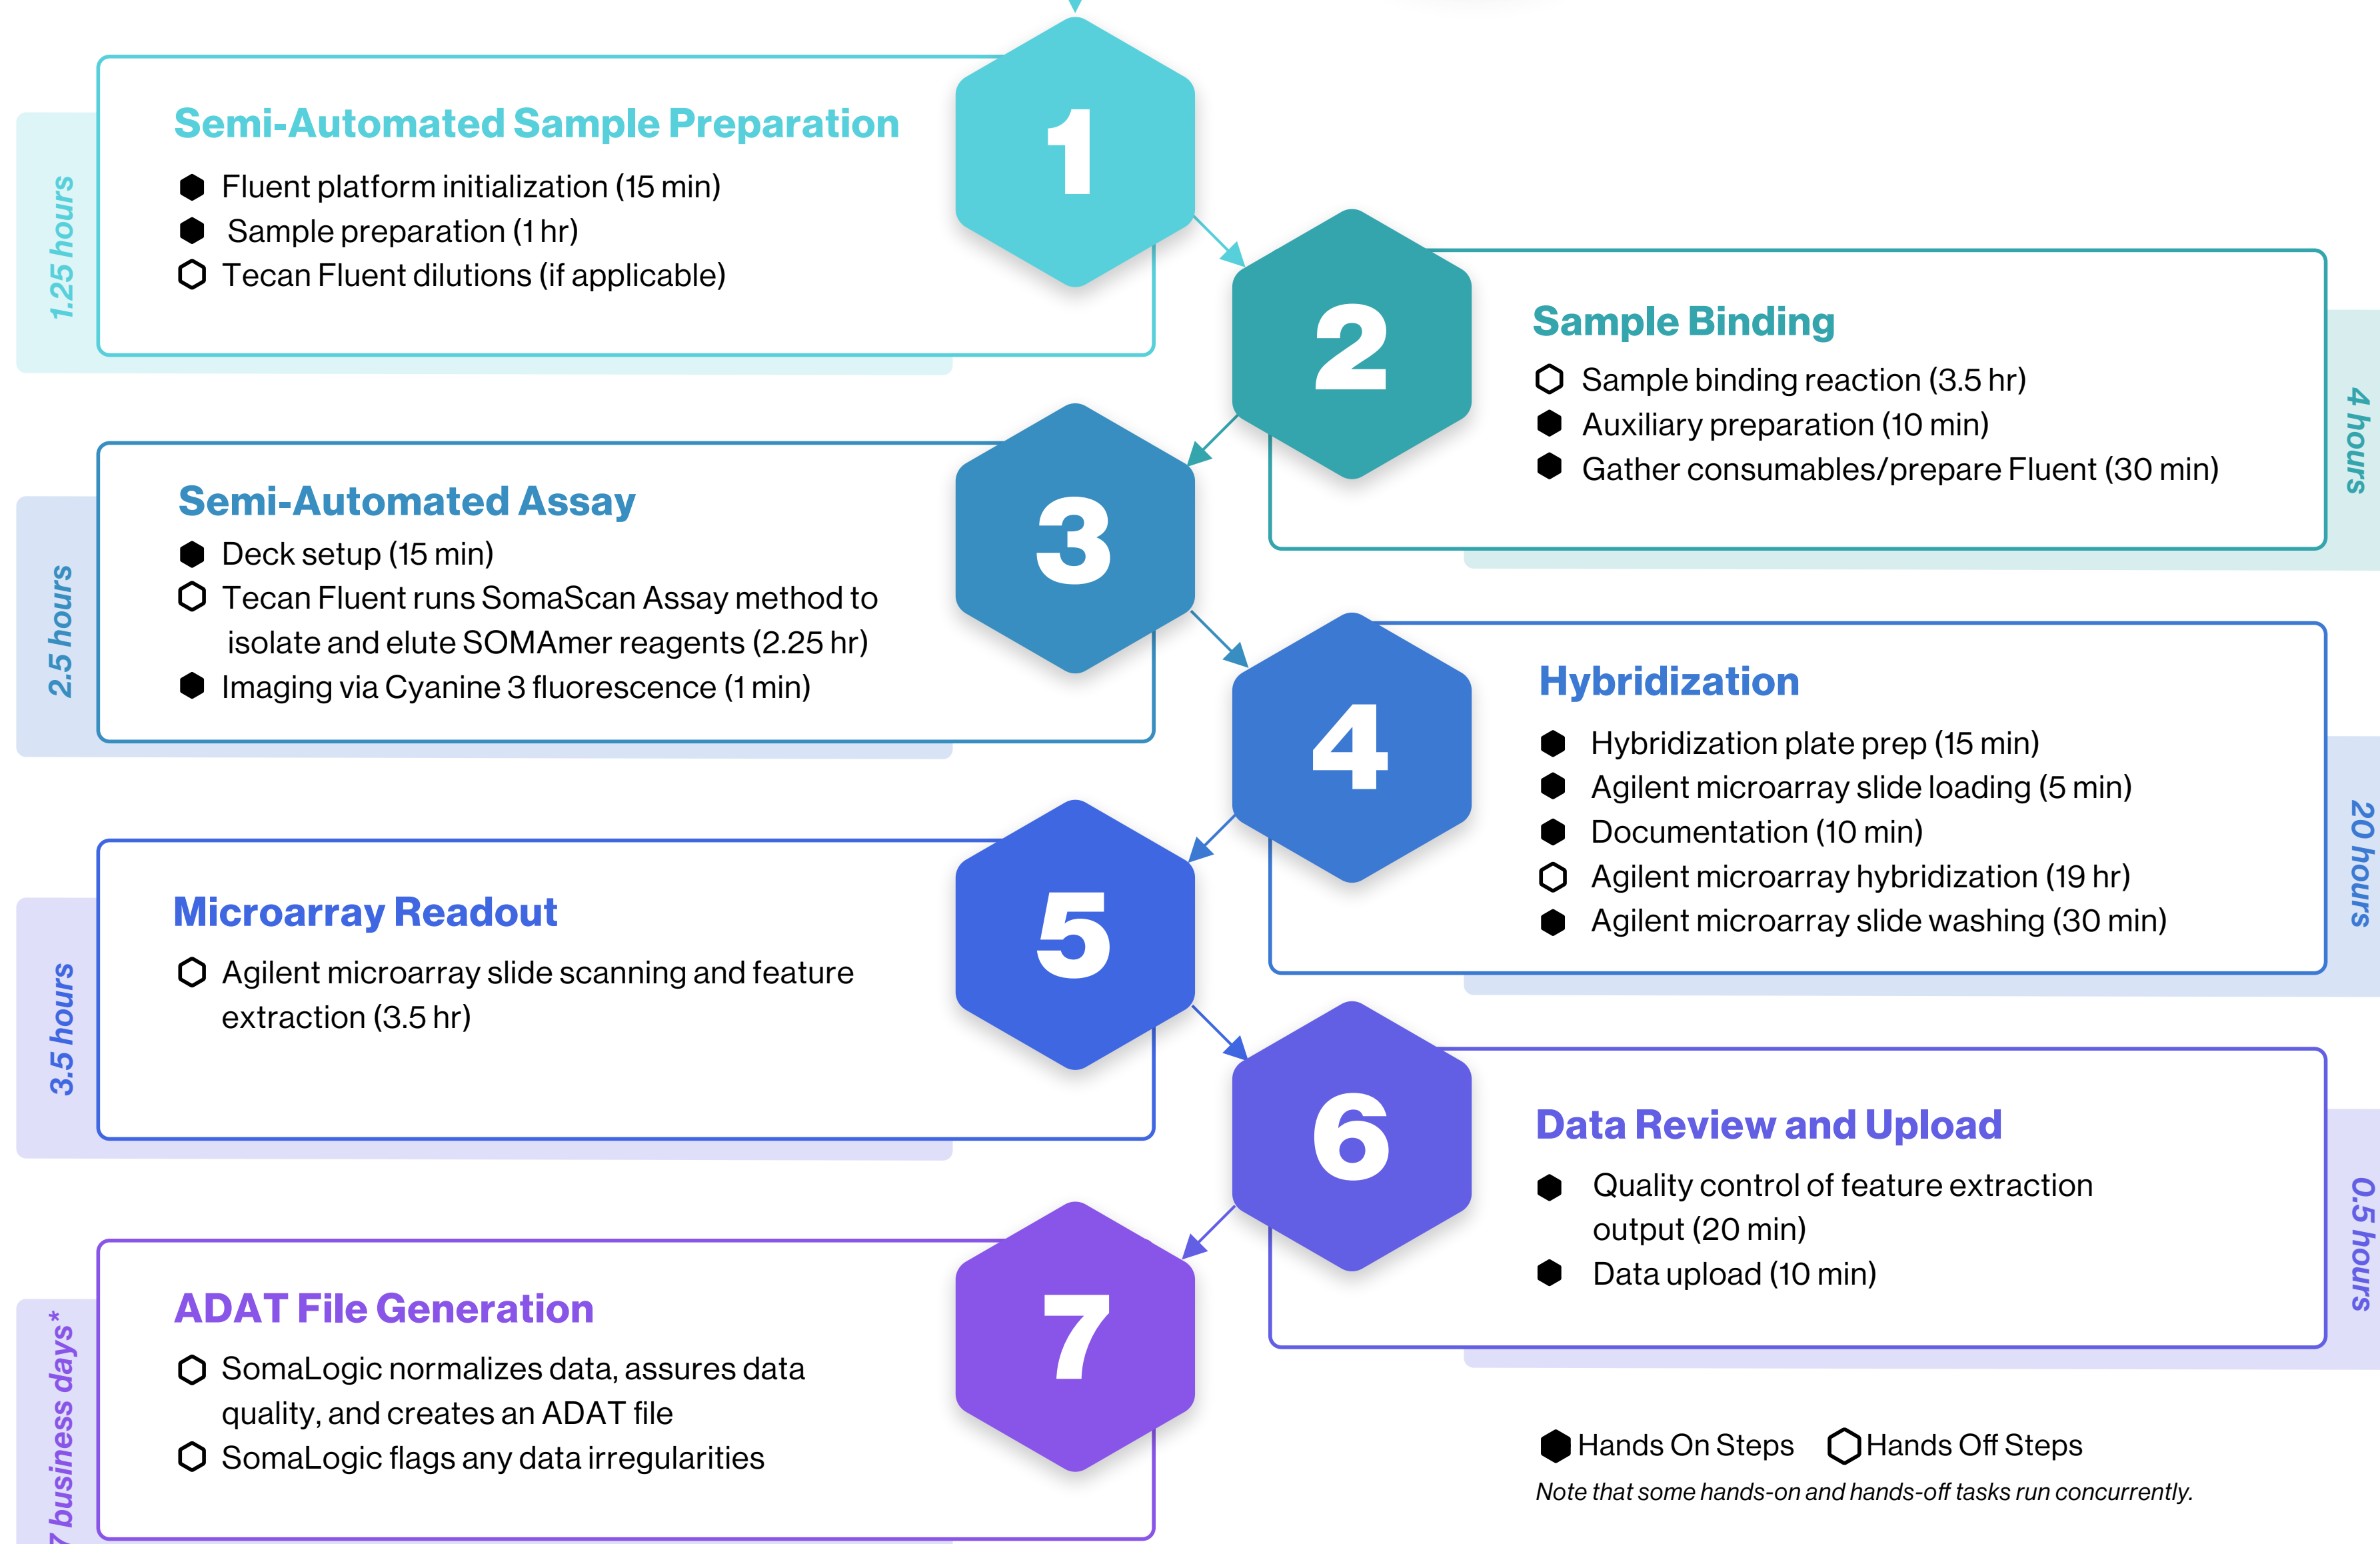

- 7,288** protein measurements per sample
- 85-90'** samples per assay kit (plasma and serum)
- 6-11'** controls per assay kit (plasma and serum)
- 5.5** hours of "hands on" lab time per assay run
- 2** days to complete assay workflow²
- 7** days from raw data upload to processed results²
- 200** sq. ft. of lab space per Tecan Fluent 780 robot

¹Samples and controls per assay vary based on the kit type
²Typical results

Assay Workflow

*Provided as an estimate. ADAT file-generation lead-time estimates are subject to fluctuate depending on demand.
